### **DETAILED ACTION**

1. This action is responsive to RCE filed 05/12/2005 and Amendment filed 04/12/2005.
2. Claims 1-8 are currently pending in this application. Claim 1 and 6 are independent claims.

### **Continued Examination Under 37 CFR 1.114**

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/12/2005 and 04/12/2005 have been entered.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
5. **Independent Claims 1-6** are rejected under 35 U.S.C. 103(a) as being unpatentable over Reichek et al US005960448A - filed 12/15/1995 (hereinafter Reichek), in view of Allam et al. US 20020116420A1 - filed 12/15/2000 (hereinafter Allam).

**In regard to independent claim 1, displaying the thumbnail corresponding to an original document and including an enhancement in appearance (as taught by Reichek at**

Art Unit: 2176

col. 4, lines 25-40), receiving a request to display the original document (as taught by Reichek at col. 4, lines 25-30),

Reichek does not explicitly teach, displaying a first version of the original document, at least a portion of the first version being more similar in visual appearance to a corresponding portion of the thumbnail than to a corresponding portion of the original document based on comparison of the at least a portion of the first version to the corresponding portion of the original document and the corresponding portion of the thumbnail, however Allam at page 4 paragraph [0053] though page 5 paragraph [0056], disclose a method of displaying and viewing electronic information using a computerized interface such as EIW (Enhance Interface Window), wherein FIG 10 through FIG 12 show the Enhance Interface Window for displaying and viewing electronic information , wherein (a) displaying in a first window representations of physical pages, (b) extracting information from the electronic page view, and (c) presenting the extracted information in a second window. For example FIG. 10 shows an electronic document with markup annotations 124, 196, 198, particularly the markup annotation 124 is defined by coordinate parameters and bounds textual information relating to "Northern Virginia Electronic Cooperative." Three boxes have been drawn around three paragraphs on the electronic page view 130. The information manager extracts the information shown in the bounded boxes and displays it in the left display area 126 of the screen. The above steps read in the broadest reasonable interpretation as claimed, wherein in FIG. 10 shows an electronic document, which is reasonably equivalent to displaying a first version of the original document as claimed. It is appreciated by a person of ordinary skill in the art that thumbnail is a graphical object that is associated with a particular document or image

file, when selecting a thumbnail causes the associated document to open, in this case Markup annotation 124 is defined by coordinate parameters and bounds textual information relating to "Northern Virginia Electronic Cooperative." Using the EIW, which is reasonable equivalent to a portion of the first version being more similar in visual appearance to a corresponding portion of the thumbnail than to a corresponding portion of the original document based on comparison of the at least a portion of the first version to the corresponding portion of the original document and the corresponding portion of the thumbnail as claimed.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to have modified Reichek, wherein a user can efficiently create a persuasive and effective presentation of original document information, to include a means of displaying and viewing electronic information using a computerized interface such as EIW (Enhance Interface Window) of Allam. One of the ordinary skills in the art would have been motivated to perform such a modification to provide an improved displaying and viewing systems and methods, particularly for electronic documents that present a large amount of electronic information (as taught by Allam page 1 paragraph [0010]).

**In regard to independent claim 6** incorporate substantially similar subject matter as cited in claim 1 above, and is similarly rejected along the same rationale.

6. **Dependent Claims 2-5 and 7-8** are rejected under 35 U.S.C. 103(a) as being unpatentable over Reichek et al US005960448A - filed 12/15/1995 (hereinafter Reichek), in view of Allam et al. US 20020116420A1 - filed 12/15/2000 (hereinafter Allam).

**In regard to dependent claims 2-4 and 7-8** incorporate substantially similar subject matter as cited in claim 1 above, and are similarly rejected along the same rationale.

Art Unit: 2176

**In regard to dependent claim 5,** is directed to a storage medium for performing the method of claim 1, and is similarly rejected along the same rationale.
